```javascript
/**
 * Placeholder lead generator.
 * In production: replace with an AI enrichment pipeline, external
APIs (Clearbit/Apollo/Snov), or a scraping pipeline.
 * Here we copy a template CSV from /leads/<niche>.csv to
/generated
 */
const fs = require('fs');
const path = require('path');
const config = require('./config');

module.exports = async function generateLeads(niche, count =
500) {
  const template = path.join(config.leadsFolder, `${niche}.csv`);
  if (!fs.existsSync(template)) throw new Error('Niche not
supported or template missing');
  if (!fs.existsSync(config.generatedFolder))
fs.mkdirSync(config.generatedFolder);
  const out = path.join(config.generatedFolder,
`${niche}-${Date.now()}.csv`);
  // For now, simply copy file (keeps delivery instant & safe)
  fs.copyFileSync(template, out);
  return out;
};
```
